**Converged Network Solutions Offers Free White Paper on the
Enterprise End-Users' Benefits from IP Multimedia Subsystem (IMS)**

*IMS Enables Faster and Less Expensive Service Enablement of Applications Important to
Enterprises*

DALLAS – April 5, 2006 – Converged Network Solutions, Inc. (CNS) has announced the availability of a free IMS white paper with emphasis on the enterprise end-users' perspective. The paper specifically focuses on the potential benefits accrued to enterprises through the deployment of IMS by service providers such as at&t, Verizon and Sprint.

“IMS has been under evaluation by virtually all the major service providers including anticipated deployments of point solutions supporting enterprises,” said Matthew Bowers, CEO at CNS. “We expect that over the next 12 to 24 months there will be significant expansion in the deployment of these systems to support new emerging services to both enterprises and consumers.”

The white paper highlights examples of various IMS enabled applications and services that will provide substantial differentiation to service providers and value to their enterprise customers. “IMS presents service providers with a framework from which to deliver applications and services faster and with less expense,” said Brian White, CMO at CNS “This shift will enable service providers to meet the increasing demands being placed on them by enterprises to deliver competitive advantage through customized services.”

IMS will enable a myriad of new and innovative service offerings. Some of the services and enablers mentioned in the white paper include Fixed/Mobile Convergence, Unified Messaging, Multimedia, and Presence.

To access the white paper, please visit the CNS website at www.convergedns.com.
